

Enhancing Safety, Independence & Peace of Mind with Tenera Care

At Dublin Glenn Memory Care, we are committed to providing personalized, innovative care that empowers our residents to live with dignity, comfort, and security. That's why we've chosen Tenera Care, a state-of-the-art real-time tracking system that enhances safety while supporting independence for those living with memory loss.

Why Tenera Care?

Memory care residents often face challenges with independence and safety. Traditional systems are reactive, requiring residents to call for assistance. Tenera Care changes that. With real-time location tracking and customized alerts, we can proactively respond to each resident's unique care needs—allowing them to move freely within the community while ensuring their safety.

How Tenera Care Supports Our Residents & Families

-  **Immediate Notifications** – Our care team receive real-time updates on immediate needs.
-  **Live Location Tracking** – Instantly locate residents and team members on the easy-to-read RTLS map.
-  **Peace of Mind for Families** – Knowing their loved one is cared for with a system that supports safety, security, and personalized attention.

-  **Freedom with Safety** – Residents can explore the household while we monitor their well-being in real time. TeneraCare supports independence and safety through real-time monitoring.
-  **Custom Alerts for Personalized Care** – We program alerts based on individual care needs, preferences, and habits, ensuring the right support at the right time.

Innovation in Memory Care

By integrating Tenera Care into our household model of memory care, we empower residents to maintain as much independence as possible, while ensuring they receive the right level of support when they need it. This technology enhances our ability to provide responsive, individualized care—supporting independence, safety, and comfort for our residents and their families
